

fade[®] acoustic plaster

CASE STUDY: lavender bay, *australia*

ARCHITECT: DBJ Architects | LOCATION: Sydney, Australia | COMMENT: 180 m² plus+

Lavender Bay located in Sydney, Australia designed by Durbach Block Jagers Architects and build in 2019.

Lavender Bay is a residential suburb with expansive views of Sydney Harbour. It is located 3 kilometres north of the Sydney central business district, in the local government area of North Sydney Council.

A wharf is located in the bay which provides access to private vessels. The Lavender Bay Baths (1910), also known as Cavill's Baths, a tidal swimming pool, were once popular with swimmers, located in the area beside the ferry wharf.

Wendy Whiteley created a garden adjacent to her home, in the area between Clark Park and the old railway line. It is sometimes known as Wendy's Secret Garden, and is open to the public.

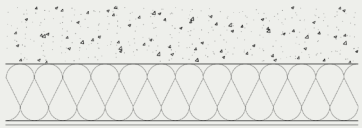

fade[®] Acoustic Ceilings is very proud to have supplied 180m² of our fade[®] Acoustic Plaster Plus+ to the project.

lavender bay, *australia*

INSTALLATION METHOD

* Type A - Direct-to soffit installation:

25mm (1") acoustic boards have been installed direct-to-soffit with adhesive.
fade® Acoustic Plaster *Plus+* has been spray applied in two layers to a total thickness of 3mm (1/8").
